The agency theory of corporate governance is quite simple, at least on the surface. It states that corporate executives have a moral and financial duty to act in the best interests of the parties they serve, specifically the shareholders. In practice, agency theory can sometimes be quite challenging, especially when there are billions of dollars at stake. TL;DR (Too Long; Didn't Read) The ...

The debate on the relationship between corporate social responsibility (CSR) and corporate financial performance (CFP) has been ongoing (Alexander & Buchholz, 1978). Yet empirical results concerning the nature of the relationship are equivocal. Some studies detect a positive relationship, while various others find negative, no or even curvilinear (e.g., U-shaped) relationships. Despite this ...

During the 2008–2009 financial crisis, firms with high social capital, as measured by corporate social responsibility (CSR) intensity, had stock returns that were four to seven percentage points higher than firms with low social capital. High?CSR firms also experienced higher profitability, growth, and sales per employee relative to low?CSR firms, and they raised more debt. This evidence ...
